SUMMARY

Analytical, detail-oriented professional with 5+ years of experience turning customer interaction and operational data into actionable insights. Experienced analyzing omnichannel performance (phone, chat, email), building Power BI and Excel reporting, and communicating findings to leaders to improve quality, compliance, and efficiency. Strong foundation in data integrity, KPI/SLA measurement, trend analysis, and storytelling to influence process improvements in a fast-paced environment.

KEY SKILLS

Analytics & Insight Generation | KPI/SLA & Productivity Analysis | Trend Analysis | Data Storytelling & Presentations | Cross-Functional Collaboration | Process Improvement | Quality Assurance & Compliance Auditing | Coaching/Feedback Loops | Power BI | Microsoft Excel (PivotTables, charts) | Microsoft PowerPoint | Microsoft Teams | Google Workspace | CRM/Case Management & Chat Systems | Data Accuracy & Reporting Integrity | Customer Experience (Omnichannel)

WORK EXPERIENCE

Quality Assurance Consultant - CarMax | Richmond, VA | 2020 - 2025

- Analyzed high-volume customer interactions across phone, chat, and email to evaluate quality, compliance, and performance against defined standards and KPIs.
- Built and maintained Excel and Power BI dashboards to visualize QA trends, channel performance, and recurring defect themes; surfaced insights to drive operational improvements.
- Produced recurring performance reporting for leaders, translating complex findings into clear narratives and recommendations to support decision-making.
- Partnered cross-functionally with leadership and compliance stakeholders to validate results, align on evaluation criteria, and prioritize improvement opportunities.
- Improved QA evaluation accuracy by 9% by strengthening scoring consistency, calibration, and reporting checks.
- Reduced compliance opportunities by 23% by identifying root causes, sharing targeted insights, and reinforcing data-driven feedback loops with frontline teams.
- Ensured reporting integrity across multiple systems by reconciling data sources, documenting assumptions, and flagging anomalies for resolution.
- Contributed to audit program design by refining evaluation workflows and supporting continuous improvement of QA processes.
