SUMMARY

Detail-oriented support and QA professional with 5+ years of experience handling and analyzing high-volume phone, chat, and email interactions, documenting outcomes, and improving resolution quality through process adherence and clear communication. Skilled in troubleshooting user issues, following protocols, escalating urgent situations, and ensuring accurate logging and reporting across systems. Proficient with CRM/ticketing-style workflows, Microsoft Excel, and Power BI; known for calm conflict resolution and timely follow-through.

KEY SKILLS

Help Desk Support (Phone/Chat/Email) | Issue Logging & Documentation | Ticket Routing & Escalation | Hardware/Software Troubleshooting (Basic) | User Support & Training (Basic How-To) | Conflict Resolution & De-escalation | Following Written/Oral Procedures | SLA/Productivity Adherence | QA Auditing & Compliance Monitoring | Root Cause/Trend Analysis | Reporting & Dashboards (Excel, Power BI) | Microsoft 365 (Word, Excel, PowerPoint) | Google Workspace | Microsoft Teams | CRM & Chat Systems

WORK EXPERIENCE

Quality Assurance Consultant - CarMax | 2020 - 2025

- Supported multi-channel customer and agent interactions (phone, chat, email) by reviewing cases, identifying issue types, and ensuring accurate documentation aligned to established protocols.
- Logged, tracked, and documented interaction outcomes and resolutions across multiple systems; ensured data integrity for reporting and audit readiness.
- Diagnosed recurring user/process issues by researching case history and available knowledge resources; surfaced root causes and recommended corrective actions.
- Followed escalation procedures for urgent or high-risk situations; redirected issues to the appropriate teams and verified handoffs were complete.
- Created and maintained Excel and Power BI dashboards to monitor trends, resolution quality, and SLA-related performance; delivered clear summaries to leadership.
- Partnered with leadership and compliance stakeholders to communicate findings, validate results, and standardize evaluation criteria and workflows.
- Improved evaluation accuracy by 9% and reduced compliance opportunities by 23% through targeted feedback loops, coaching notes, and process adjustments.
- Conducted follow-up reviews to confirm issues were fully resolved and documentation met quality standards.
