SUMMARY

Detail-oriented operations and quality professional with 5+ years at CarMax supporting high-volume, process-driven work requiring accurate documentation, cross-functional coordination, and timely issue escalation. Experienced reviewing account-level information across multiple systems, maintaining detailed records, and using Excel/Power BI reporting to prioritize work and improve productivity and compliance. Strong customer service and stakeholder communication skills across phone, chat, and email channels.

KEY SKILLS

Record Keeping & Documentation | Account Review & Case Updates | Process Adherence | Issue Escalation | Cross-Functional Coordination | Customer Service | De-escalation | Compliance Auditing | Quality Standards | Productivity/SLA Adherence | Reporting & Dashboards | Microsoft Excel & Word | Power BI | Microsoft Teams | Google Workspace | CRM/Case Management & Chat Systems | Time Management | Continuous Improvement

WORK EXPERIENCE

Quality Assurance Consultant - CarMax | Richmond, VA | 2020 - 2025

- Reviewed and documented customer phone, chat, and email interactions to ensure quality and compliance; maintained accurate records and updates across CarMax systems.
- Audited account-level details and supporting documentation to validate adherence to policies and required information, escalating exceptions to leadership/compliance partners.
- Served as a point of contact for agent performance and process questions; provided clear guidance and follow-up to resolve documentation gaps and reduce repeat issues.
- Partnered with internal business teams to remove obstacles impacting resolution timelines, aligning on next steps and ownership for complex cases.
- Built and maintained Excel and Power BI reports to track productivity, priorities, and trend drivers; organized daily work based on department reporting and SLA needs.
- Produced concise performance summaries and data-driven insights for leadership, improving visibility into channel health and operational risk.
- Improved evaluation accuracy by 9% and reduced compliance opportunities by 23% by implementing tighter feedback loops, calibration, and targeted coaching recommendations.
- Contributed to audit program design and controls, strengthening reporting integrity and consistency across multiple data sources.
