SUMMARY

Detail-oriented audit and compliance professional with 5+ years of experience evaluating operational and consumer compliance adherence across customer-facing channels. Skilled in audit scoping, control testing, walkthrough-style reviews, workpaper-quality documentation, and reporting actionable findings to leadership. Strong analytical foundation with advanced Excel and Power BI dashboarding to identify trends, errors, omissions, and opportunities for control and process improvement. Experienced partnering cross-functionally to validate results, support audit program design, and strengthen internal controls.

KEY SKILLS

Internal Audit Support | Operational Audits | Consumer Compliance Monitoring | Internal Controls Testing | Audit Scope & Planning Support | Walkthroughs & Process Understanding | Workpaper Documentation | Process Narratives & Reporting | Risk/Control Identification | Error & Exception Detection | Corrective Action Follow-Up | Data Analysis | Power BI | Advanced Excel (PivotTables, Lookups) | CRM/Case Management Systems | Cross-Functional Collaboration | Written & Verbal Communication | Time Management | Attention to Detail | Independent & Team-Based Execution

WORK EXPERIENCE

Quality Assurance Consultant - CarMax | 2020 - 2025

- Executed audit-style reviews of customer phone, chat, and email interactions to assess compliance with policies, procedures, and quality standards; documented results and exceptions with clear evidence.
- Supported audit planning by identifying high-risk themes, defining review scope by channel/process, and aligning evaluation criteria to current requirements and internal standards.
- Performed walkthrough-style evaluations of end-to-end customer interaction processes to understand control points, adherence gaps, and root causes; recommended practical control and process improvements.
- Built and maintained Excel and Power BI dashboards to analyze QA/compliance trends, error rates, and performance drivers; improved visibility for leadership decision-making.
- Prepared concise written reports and process narratives summarizing findings, trends, and corrective actions; presented insights to leadership and operational partners.
- Partnered with compliance and business leaders to validate findings, calibrate evaluation standards, and ensure consistent application of controls across teams and systems.
- Improved evaluation accuracy by 9% and reduced compliance opportunities by 23% by implementing data-driven feedback loops, targeted coaching recommendations, and tighter documentation standards.
- Ensured integrity and consistency of reporting data across multiple systems; reconciled discrepancies and strengthened documentation to support audit readiness.
- Contributed to audit program design by refining checklists, sampling approaches, and evidence requirements to improve repeatability and defensibility of results.
