SUMMARY

Detail-oriented auditor and compliance professional with 5+ years of experience evaluating operational controls and adherence to policy across high-volume customer interaction channels (phone, chat, email). Skilled in audit planning support, control testing, walkthrough-style reviews, workpaper-quality documentation, and clear written reporting to leadership. Strong analytical capabilities using Excel and Power BI to identify errors, omissions, trends, and opportunities for control and process improvement. Experienced partnering with cross-functional stakeholders to validate findings, recommend corrective actions, and monitor results.

KEY SKILLS

Internal Controls | Operational Auditing | Compliance Auditing | Control Testing | Walkthroughs | Audit Reporting | Process Narratives | Workpaper Documentation | Risk & Issue Identification | Corrective Action Follow-Up | Data Analysis | Trend Analysis | Power BI | Microsoft Excel (PivotTables, Lookups) | Microsoft Word/PowerPoint | CRM & Chat Systems | Stakeholder Management | Written & Verbal Communication | Time Management | Attention to Detail | Independent & Team-Based Work

WORK EXPERIENCE

Quality Assurance Consultant - CarMax | 2020 - 2025

- Executed operational and compliance audits of customer interactions (phone/chat/email), assessing adherence to internal policies, quality standards, and required disclosures; documented procedures and results to support management review.
- Performed walkthrough-style evaluations of end-to-end interaction processes to identify control gaps, process breakdowns, and root causes; recommended practical improvements to strengthen consistency and reduce risk.
- Built and maintained Excel and Power BI reporting to monitor key performance and compliance indicators; ensured data integrity across multiple source systems and reconciled discrepancies to maintain reporting accuracy.
- Prepared clear audit-style reports and performance narratives summarizing findings, trends, and opportunities; presented results to leadership and operational partners to drive timely action.
- Partnered with compliance and business leaders to validate findings, align on remediation plans, and track outcomes through follow-up reviews and recurring reporting.
- Improved evaluation accuracy by 9% and reduced compliance opportunities by 23% by implementing data-driven feedback loops, targeted coaching insights, and tighter calibration practices.
- Contributed to audit program design by refining evaluation criteria, sampling approaches, and documentation standards to improve repeatability and control effectiveness across channels.
