SUMMARY

Detail-oriented audit and compliance professional with 5+ years of experience evaluating operational controls and compliance across customer-facing channels (phone, chat, email). Skilled in audit execution, control testing, QA/compliance monitoring, trend analysis, and clear audit-style reporting for leadership. Strong PC skills with advanced Excel and Power BI dashboarding; experienced maintaining data integrity across multiple systems, documenting procedures, and identifying control gaps and remediation opportunities. Known for sound judgment, strong time management, and the ability to manage multiple priorities while partnering effectively across teams.

KEY SKILLS

Internal Controls | Operational Audits | Compliance Auditing | Control Testing | Audit Planning Support | Walkthroughs & Process Understanding | Workpaper Documentation | Process Narratives | Risk/Issue Identification | Corrective Action Follow-Up | Data Integrity & Reconciliation | KPI/Trend Analysis | Power BI | Advanced Excel (PivotTables, Lookups) | Reporting & Presentations | Cross-Functional Collaboration | Time Management | Attention to Detail | CRM & Chat Systems | Microsoft Office (Word, Excel, PowerPoint) | Google Workspace | Microsoft Teams

WORK EXPERIENCE

Quality Assurance Consultant - CarMax | 2020 - 2025

- Executed operational and compliance audits of customer interactions (phone, chat, email), testing adherence to internal policies, quality standards, and regulatory/compliance requirements; documented results and exceptions for leadership review.
- Performed walkthrough-style reviews with stakeholders to understand end-to-end processes, decision points, and control expectations; identified gaps, errors, and opportunities to strengthen controls and consistency.
- Built and maintained Excel and Power BI dashboards to analyze trends, isolate root causes, and monitor performance and compliance risk indicators across channels and teams.
- Prepared clear, audit-ready reports and process summaries (findings, evidence, impact, and recommendations) to support management action plans and continuous improvement.
- Improved evaluation accuracy by 9% by strengthening scoring logic, calibration, and documentation standards; increased reliability of audit evidence and reporting consistency.
- Reduced compliance opportunities by 23% by implementing data-driven feedback loops, targeted coaching insights, and follow-up monitoring to validate corrective actions.
- Ensured integrity of reporting data across multiple systems by validating inputs, reconciling discrepancies, and standardizing definitions to reduce errors and omissions.
- Partnered cross-functionally with leadership and compliance teams to validate findings, align on remediation priorities, and communicate results effectively to varied audiences.
- Contributed to audit/monitoring program design by refining evaluation criteria, sampling approaches, and documentation practices to improve repeatability and control coverage.
