SUMMARY

Detail-oriented operations and quality professional with 5+ years at CarMax supporting high-volume, multi-channel workflows through accurate documentation, detailed record keeping, and cross-functional coordination. Experienced reviewing account-level information, maintaining data integrity across systems, escalating issues, and communicating status updates to internal partners. Advanced in Excel and proficient in Power BI and CRM/case systems; recognized for improving process adherence, productivity, and compliance through actionable reporting and follow-up.

KEY SKILLS

Record Keeping & Documentation | Account Review & Status Tracking | Internal/External Partner Communication | Issue Escalation & Resolution | Process Improvement | Productivity & SLA Prioritization | Compliance Auditing | Quality Standards | Reporting & Dashboards | Microsoft Excel (filters, pivots, lookups) | Microsoft Word/PowerPoint | Power BI | Microsoft Teams | Google Workspace | CRM/Case, Chat & Email Systems | Customer Service | De-escalation

WORK EXPERIENCE

Quality Assurance Consultant - CarMax | Richmond, VA 2020 - 2025

- Reviewed customer accounts and associated documentation across phone, chat, and email interactions to ensure accuracy, compliance, and completeness of required information; updated outcomes and progress in CarMax systems.
- Maintained detailed records of findings, status, and follow-ups; ensured reporting integrity across multiple data sources and systems.
- Served as a point of contact for associates and leaders regarding quality/compliance questions; provided clear guidance and documentation requirements to resolve issues.
- Escalated high-risk or time-sensitive issues to leadership and compliance partners; tracked resolution through completion to reduce repeat defects.
- Utilized department reports and QA productivity metrics to prioritize daily workload, manage competing deadlines, and meet SLA expectations.
- Built and maintained Excel and Power BI dashboards to monitor trends, identify bottlenecks, and surface items requiring action; delivered concise weekly summaries to leadership.
- Partnered cross-functionally with leadership, operations, and compliance teams to remove obstacles, validate results, and improve process consistency.
- Improved QA evaluation accuracy by 9% and reduced compliance opportunities by 23% by implementing data-driven feedback loops and targeted coaching recommendations.
- Contributed to audit program design by refining evaluation criteria, documentation standards, and tracking methods to support continuous improvement.
